

Care and Medical Records Automatic Generation Assistant

For field workers struggling with documentation,
we provide records that require no thought.

Overview

On-site Challenges and AI Solutions

I'm not confident
in my writing.

I don't know how to
phrase the records, so it
takes time to start
writing.

It takes too long
to create records.

After a visit, it can take
over 30 minutes to
write up the records.

Time is spent on
training new
employees.

Teaching record
creation from scratch is
a significant burden.

Functionality

01. Automatically generated in seconds based on the record format

Automatically generate text summarizing dates, status, support details, etc.

02. Customizable Writing Styles, Consistent Quality

Supports switching between polite and casual language styles, enabling flexible adaptation to facility-specific operational rules.

03. Error-free, natural writing

Generate error-free records using industry-specific terminology for clear comprehension.

04. Zero Worries About Information Leaks

Avoid entering personal information to maintain a sense of security on-site

Technical Features

01. Site-Specific Design

Faithfully reflects medical and nursing care record formats

02. Safety Design

Always display a warning to prevent incorrect entry of personal information.

03. Intuitive operation you can use without hesitation

With input examples and format suggestions, anyone can use it intuitively.
